Professional Summary

Detail-oriented Junior Software Engineer with experience in .NET Core MVC and web development. Strong background in programming, databases, and machine learning projects. Passionate about solving real-world problems and building scalable applications.

Technical Skills

Programming: Python, Java, C#

Web: HTML, CSS, JavaScript

Frameworks: .NET Core MVC, Flask

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, OpenCV, YOLOv5

Work Experience

Junior Software Engineer

Jul 2025 - Present

QCVerify Pvt Ltd

Cochin, Kerala

- Developing web applications using .NET Core MVC
- Working with JavaScript and HTML for frontend
- Debugging and improving performance
- Collaborating with development team

Data Science Intern

Tecacs IT Group Pvt Ltd

- Worked on data preprocessing, analysis, and machine learning models
- Gained hands-on experience with Python and data science tools
- Collaborated on real-world data-driven projects

Current Responsibilities

- Develop and maintain backend services using .NET Core MVC
- Implement frontend features using HTML, CSS, and JavaScript
- Work on both frontend and backend (full-stack development)
- Debug, test, and optimize application performance
- Collaborate with cross-functional teams

Certifications

Privacy and Security in Online Social Media (NPTEL)

TCS CodeVita Rank 6704

Presented and published a paper titled “Personalized Movie Recommendations: Leveraging Content-Based Filtering and Cosine Similarity” at an International Conference on Artificial Intelligence and Machine Learning

Education

Master of Computer Applications

2023 - 2025

Mar Baselios Institute of Technology ,Kothamangalam

CGPA: 7.62

Bachelor of Computer Applications

2020 - 2023

Mar Baselios College, Adimali

72.3%

Higher Secondary (Computer Science)

2018 - 2020

SNDP HSS, Adimali

75%

Secondary Education (10th)

2017 - 2018

St. Sebastian’s High School, Thokkupara

85%

Security & Compliance Experience

- Completed certification in Privacy and Security in Online Social Media (NPTEL)
- Understanding of secure coding practices and data protection principles
- Awareness of handling sensitive data in web applications

Projects

Confidential Freight Quotation Platform (Client Project)

Full-stack web platform for generating and managing quotation workflows

- Developed full-stack application using React and Next.js
- Built responsive and dynamic user interfaces for quotation workflows
- Implemented server-side logic and routing using Next.js
- Developed features for generating, managing, and comparing quotations
- Managed data handling and application state for smooth user interactions

Internal Auditing Tool (Enterprise Application)

Company internal auditing and compliance management system

- Built modules using ASP.NET Core MVC, C#, and CSHTML
- Designed interactive UI using JavaScript, Bootstrap, and DevExpress
- Implemented data validation, reporting, and audit workflows
- Enhanced system efficiency for internal operations

Fire Detection System

Real-time fire and smoke detection system using YOLOv5

- Developed real-time detection system using YOLOv5 and OpenCV
- Built Flask-based web interface for monitoring
- Applied transfer learning and data augmentation for improved accuracy

Movie Recommendation System

Content-based recommendation system using TF-IDF and cosine similarity

- Built machine learning model to recommend movies based on user preferences
- Applied TF-IDF vectorization and cosine similarity techniques
- Developed frontend interface using HTML, CSS, and JavaScript

Real Estate Management System

Web-based platform for property buying, selling, and renting

- Developed backend using Flask and managed data with MySQL
- Enabled property listing and user interaction features
- Simplified traditional real estate workflows

Availability / Role Scope

- Currently working as a Junior Software Engineer
- Available during standard organizational working hours, with flexibility to support extended hours during critical releases or incidents
- Responsible for development, maintenance, and support of assigned tasks and modules
- Actively collaborates with cross-functional teams including development and QA
